

MAHABUB HASAN

Woodside, Queens, NY 11377, +1862-250-5862, mtechhasan.it@gmail.com, [LinkedIn](#), [Portfolio](#)

WORK STATUS: **U.S Permanent Resident**

PROFESSIONAL SUMMARY:

Experienced over 7+ years in the IT industry with diversified experience as Project Coordinator, Project Analyst, and QA Analyst supporting enterprise IT initiatives across banking, financial services, and consulting environments. Extensive experience in coordinating and supporting full Software Development Life Cycle (**SDLC**) and Project Management Life Cycle (**PMLC**) using **Agile (Scrum & Kanban)** and **Waterfall methodologies**, including requirements analysis, project planning support, **QA/testing**, UAT coordination, API validation, and risk and issue management. Strong background in **Mainframe and TSYS** systems with hands-on experience in **data analysis**, validation, and reporting using **SQL, Excel, and Python**. Proven ability to support on-time, high-quality project delivery through effective project governance and cross-functional collaboration.

KEY SKILLS:

IT Project Management || Business & Technology Transformation | Mainframe Systems Support | End-to-End Project Delivery | Requirement Analysis & Traceability | Risk & Issue Management | Stakeholder Engagement | Process Improvement | Agile (Scrum & Kanban) | Waterfall Methodology | SQL & Python | API Validation & Testing | Cross-Functional Team Coordination | Collaboration Tools: Microsoft Teams, Zoom, Google Workspace | Windows, MacOS, Linux | Scope & Schedule Management | Resource Planning | Change Management | Reporting & Documentation | Quality Assurance

PROFESSIONAL SKILLS

Over 7+ years of Project Management, IT Delivery, and System Validation experience with strong emphasis on enterprise project coordination, business transformation initiatives, and Mainframe QA/testing exposure.

- Solid understanding of Project Management Life Cycle (**PMLC**) and Software Development Life Cycle (**SDLC**) including **Agile (Scrum & Kanban)**, **Waterfall**, **Iterative**, and **Safe Agile frameworks**.
- Expertise in **End-to-End Project Planning**, Scope & Schedule Management, Risk & Issue Management, Resource Allocation, and Stakeholder Engagement across large-scale enterprise IT programs.
- Experienced in Requirements Analysis, Business Process Mapping, Traceability, and **Requirement Traceability Matrices (RTM)** to ensure business and technical alignment.
- Strong exposure to system validation, QA processes, defect coordination, and testing of Mainframe-based applications (**TSYS, credit card operations**).
- Hands-on experience in **API validation, data validation**, and **end-to-end system testing** to support high-quality project delivery.
- Skilled in Project Tracking & Reporting using tools like **Microsoft Project, Jira, Monday.com**, Practitest, Excel (formulas, macros, dashboards), Confluence for executive-level reporting.
- Adept at Collaboration & Communication across **cross-functional** teams, clients, and leadership; excellent status reporting, stakeholder updates, and coordination.

- Expertise in Change Management, Process Improvement, **Risk Mitigation**, and Issue Resolution to optimize project outcomes and operational efficiency.
 - Strong experience in **Project Documentation**, including project charters, scope documents, risk logs, status reports, dashboards, test plans, and process guides.
 - Technical exposure to Mainframe systems, **SQL, Python, API testing, RESTful & SOAP** services, **Windows, MacOS, Linux**, and data integration points.
 - Knowledge of Data Validation and Analytics, including preparing dashboards, reports, and metrics for project tracking and business insights.
 - Experienced in Vendor Coordination, IT Governance, and Enterprise System Integration, ensuring timely delivery and adherence to standards.
 - Familiarity with System Testing Methodologies, including Black Box, Functional, Integration, Regression, **End-to-End**, and **User Acceptance Testing (UAT)**.
 - Strong experience in cross-functional team coordination, project scheduling, task prioritization, and meeting critical path milestones.
 - Committed to continuous process improvement, operational efficiency, and quality assurance practices, ensuring high-quality project delivery.
 - Excellent analytical, problem-solving, and decision-making skills with ability to handle multiple priorities in dynamic enterprise environments.
 - Experienced in facilitating workshops, requirement walkthroughs, and project review meetings with stakeholders to ensure alignment and risk mitigation.
 - Hands-on knowledge of toolsets supporting IT delivery and **QA, including Microsoft Teams, Zoom, Google Workspace, Confluence, SharePoint, Jira, HP ALM/Quality Center, TFS, and Practitest**.
 - Exposure to automation concepts and frameworks including test scripts for Mainframe, **API validation, and Excel/VBA macros** to support process efficiency.
- Strong track record of ensuring timely project completion, quality delivery, and client satisfaction across multiple IT and business transformation initiatives.

TECHNICAL SKILLS

IT Tools & Platforms:

Microsoft Project | Jira | Monday.com | Visual Studio | TSYS | Mainframe | Excel Macros

Methodologies & Practices:

Agile (Scrum, Kanban) | Waterfall | Lean | End-to-End Project Planning | Scope & Schedule Management | Risk & Issue Management | Change Management | Process Improvement | Safe Agile

Technical & Data Skills:

SQL | Python | Data Analysis & Validation | Dashboard & Reporting | Requirement Traceability | Defect Tracking | API Validation | System Integration | Process Optimization

QA / Testing Tools (Supportive):

Selenium WebDriver | TestNG | JUnit | Maven | Postman | REST-Assured | Swagger UI | Jenkins | Git | UFT | LeanFT | Cucumber | Apache POI | BDD | MicroFocus Reflection | SuperPutty

Web Debugging Tools:

XPath | Firepath | Firebug

Application & Development Tools:

Eclipse | IntelliJ | NetBeans | Visual Studio | Ant | Maven

Version Control / Source Control:

SVN | GitHub

Continuous Integration Tools:

Jenkins | Team Foundation Server (TFS)

Documentation & Reporting Tools:

Microsoft Office Suite | Excel (Advanced, Macros, Dashboards) | SQL Developer | TeraData | Atlassian Confluence | SharePoint | GSuite

Collaboration & Communication Tools:

Microsoft Teams | Zoom | Slack | Skype for Business | Lync | Office Communicator | MS Outlook

PROFESSIONAL EXPERIENCE:

US Bank | New York|

Oct 2024 – Present

Project Analyst**Advanced Project & QA Support – Mainframe / TSYs Systems**

US Bank is a leading American financial services provider, offering **commercial banking, investment banking, asset management, and digital banking services** to corporate and retail clients.

Responsibilities & Accomplishments:

- Maintained and developed business knowledge and client relationships while performing **project coordination** and **QA-related support**.
- Analyzed **User Stories, Acceptance Criteria, and Design Specification Documents** to identify **test conditions** and project deliverables.
- Managed **Agile (Scrum) projects**, participating in **Sprint Planning, Daily Scrum, Sprint Review, Retrospective**, and **backlog grooming**.
- Created and tracked **Test Plans, Test Scenarios, and Test Cases** for **system enhancements, Mainframe/TSYS processes, and integrated backend databases**.
- Conducted **manual and automated UAT, regression, and functional testing**, including **API validation** using **Postman, REST-Assured, and Swagger**.
- Coordinated with **developers and business users** to validate **output data** from **Mainframe, TSYs, and backend databases (SQL, Oracle)**.
- Performed **backend testing** and **data verification** using **SQL queries, Excel Macros, and ODBC connections** from CSV, Access, and flat files.
- Managed **defect lifecycle** using **Jira**, tracking issues until closure, and providing detailed **QA reports** to stakeholders.
- Automated and documented **test scripts and processes** to improve efficiency and reduce manual intervention.
- Implemented **cross-platform QA validation** across **Windows, MacOS, and Linux** environments.
- Supported **API and Web Service testing (REST/SOAP)** using **Java, REST-Assured, and Postman**, including validation of **JSON and XML payloads**.
- Assisted in **Mainframe process testing** through **TSYS (MicroFocus Reflection) interface** and **C3 batch system**.
- Produced detailed **documentation, dashboards, and executive reports** using **MS Excel, SharePoint, and Confluence**.

Environment:

Supper Putty | WinSCP | J2EE | HP ALM | UFT | Selenium WebDriver | JUnit | TestNG | Jenkins | Maven | Eclipse IDE | RESTful | REST-Assured | XPATH | DOM | HTML | CSS | JavaScript | Agile | SCRUM | MS Excel | MS Access | Mozilla Firefox | Chrome | Safari | Edge | SQL | MySQL | Oracle | Windows | MacOS | Linux | Apache Tomcat | Jira | Microsoft Project | Monday.com | Practitest | Visual Studio | Microsoft Teams | Zoom | Google Workspace | VBA | Cucumber | BDD | MicroFocus Reflection.

Capital Advisors NY LLC | New York |

Oct 2023 – Sep 2024

Project Coordinator**Advanced Project Management – IT & Operations Initiatives**

Capital Advisors NY LLC is a financial and professional services firm based in Astoria, NY, offering tax planning, immigration assistance, and business advisory services to individuals and small businesses nationwide. The firm provides comprehensive support in financial strategy, operational efficiency, and regulatory compliance to optimize client outcomes and internal processes.

Responsibilities & Accomplishments:

- Coordinated day-to-day execution of IT and business projects, ensuring alignment with defined scope, timelines, and deliverables.
- Developed, maintained, and tracked project schedules, task plans, milestones, and dependencies using project management tools.
- Coordinated cross-functional resources and priorities across IT, operations, and external vendors to support project delivery.
- Served as the primary point of contact for stakeholders, facilitating clear communication and timely issue resolution.
- Identified, logged, and tracked project risks, issues, and dependencies, escalating as needed and supporting mitigation plans.
- Supported Agile delivery practices (Scrum and Kanban), including sprint planning, task tracking, and workflow optimization.
- Prepared and delivered executive-level project status reports, dashboards, and documentation for leadership review.
- Supported change management and process improvement initiatives to enhance operational efficiency.
- Ensured projects were delivered on time, within scope, and aligned with organizational objectives and compliance standards.

Environment: Microsoft Project | Jira | Monday.com | Practitest | Microsoft Teams | Zoom | Google Workspace | MS Outlook | Slack | Teams | GSuite | SharePoint | SQL | Python | Windows | MacOS | Linux

Graduate Assistant

Sep 2022 – Sep 2023

Touro University | 3 Times Square | New York

Touro University is a leading academic institution committed to delivering high-quality education, research, and administrative support to students and faculty across diverse programs.

Responsibilities & Accomplishments:

- **Supported academic and administrative initiatives** by assisting faculty and department staff in coordinating tasks, schedules, and deliverables.
- **Assisted professors with research activities**, including data collection, basic data analysis, and preparation of academic and operational reports.
- **Provided technology-related support** for academic projects, utilizing learning management systems, data tools, collaboration platforms, and **Zoom** for virtual coordination.
- **Managed academic documentation, project records, and schedules** to ensure organized tracking of university initiatives.
- **Coordinated meetings, classes, and departmental activities**, preparing materials, agendas, and follow-up documentation.
- **Tracked academic deadlines, research milestones, and administrative deliverables** to support timely project and program completion.

Environment:

Microsoft Office Suite | Google Workspace | Learning Management Systems | Data Analysis Tools | Collaboration Platforms | Zoom

Lux Sourcing Limited | Dhaka

Jan 2017 – Dec 2020

Project Associate

Lux Sourcing Limited is a leading sourcing and operations consulting firm in Bangladesh, providing end-to-end support for supply chain management, vendor coordination, and operational process improvements for clients across multiple industries. During this role, I worked on **operational and IT support projects**, focusing on process optimization, data validation, and cross-functional project coordination.

Responsibilities & Accomplishments:

- Supported **planning and execution of multiple operational projects**, ensuring alignment with organizational goals and client requirements.
- Coordinated resources, schedules, and deliverables across **cross-functional teams** to ensure timely project completion.
- Assisted in the implementation of **process improvement and quality enhancement initiatives**, identifying gaps and recommending solutions to optimize operations.
- Collaborated with team members to **analyze requirements, prepare project documentation, and track project milestones** using project management tools.
- Conducted **data validation and reporting**, ensuring accuracy in operational records and project outcomes.
- Developed and maintained **Excel-based dashboards and reporting tools** to track project progress, monitor KPIs, and support management decision-making.
- Participated in **vendor coordination and communications**, ensuring smooth execution of sourcing and operational activities.
- Assisted in **resource planning and workload management**, supporting senior management in prioritizing tasks and allocating team efforts effectively.
- Supported **change management and process documentation**, standardizing procedures to improve operational efficiency.
- Collaborated with IT teams to support **system updates, workflow automation, and integration of business processes**, ensuring operational systems functioned efficiently.
- Created and maintained **project schedules, progress reports, and status updates** to keep stakeholders informed.
- Assisted in **training and onboarding of new team members** on operational processes and project tools.
- Ensured all projects were delivered on time, within scope, and aligned with client expectations.

Environment: Microsoft Excel | Microsoft Access | Jira | Monday.com | Zoom | SQL | Windows | MacOS | Linux | Cross-functional Collaboration | Process Optimization | Project Documentation.
